

Product Information Bulletin

Bulletin #: 08-005

Subject: *INSTALLATION GUIDELINES ON SKID*

IMPORTANT NOTICE:

We have listened and due to concerns regarding the receipt of “Installation Guidelines” arriving at the end user location, we will be attaching this package to the skid in a different manner.

The “bright orange” package will be under the protective top mat on the skid. See below for actual photo and placement of package.

Advise your customers and installers that it is important to review the installation guidelines before starting the installation!
